

AMBA FAQ Excerpts and More:

What Differentiates Amba's Towel Warmers From Similar Products?

- Amba's mission is to deliver high quality products at an affordable price. Our products are made from solid 304 Stainless Steel, not mild steel. Further, our products are not plated and will not flake, a common problem amongst chrome or nickel-plated materials. Only our Traditional Collection is made of nickel plated brass, due to a demand for more traditional styling and materials.
- The majority of our Amba Towel Warmers are made with high quality Italian heating technology.
- Amba has fastest and most efficient cable heating systems available for towel warmers, designed & made in Italy.
- Amba offers a wide range of styles, sizes and finishes of Towel Warmers. If we do not have anything that matches your desire, we also have Custom Sizes (please see custom section below).
- Amba has very competitive pricing.
- We pride ourselves on customer service and satisfaction. We will always go above and beyond to make you happy and satisfied with your product. If you have a question or problem, please reach out to us and we will be happy try and help you out.

What Finishes Are Available?

- **JEEVES**: Polished SS, Brushed SS, Oil Rubbed Bronze, and White
- **QUADRO & SIRIO**: Polished SS, Brushed SS and Oil Rubbed Bronze
- **ANTUS, ELORY VEGA, FREESTANDING** and **SWIVEL**: Polished SS and Brushed SS
- **TRADITIONAL** collection is offered in 1 finish: Polished Nickel
- All finishes are the same price for any model

How is Amba On Energy Conservation?

As for energy conservation, Amba's products are front and center. Our towel warmer collections provide efficient heat and yet, they use minimal energy to operate. Depending on the unit and its location, Amba towel warmers consume approximately the same amount of energy as a few light bulbs. And accessories such as timers and digital heat controllers make it easy to maximize energy savings.
