Since its creation, the Modric range of architectural ironmongery has been synonymous with three words; quality, durability and aesthetics. Allgood have now developed a new range of architectural washroom panels and accessories which have been designed under the very same principles.

The signature of the Modric washroom range is the radius detail which provides the unifying aesthetic element. Marine grade 316 stainless steel is utilised to form the consistent visual appearance whilst providing the highest level of corrosion resistance. Manufactured in the UK with the attention to detail that only Allgood provide, the Modric range enhances the washroom environment whilst providing faultless performance for years to come.
